

AI Data Analyst Report

Dataset: ecommerce_demo.csv · Generated August 17, 2026 13:47 UTC
500 rows · 10 columns · 0 duplicates removed

Key Performance Indicators

Metric	Value	Trend
Total Unit Price	\$405.1K	▼ 37.0%
Total Records	500	—
Avg Unit Price	\$810.16	—
Order Id	1.3K	—

AI-Generated Insights

■ Unit Price decreased 37.0% month-over-month

From \$32.6K to \$20.6K. Monitor this trend closely.

Columns used: unit_price, date · 500 rows · Confidence: 92%

■ Electronics is the top-performing Category (90.4% of total)

Generating \$366.3K total. Consider expanding offerings in this category.

Columns used: category, unit_price · 500 rows · Confidence: 90%

Recommendations

- Double down on Electronics — increase inventory or marketing budget by 15–20%.
- Implement monthly revenue tracking dashboards to catch trends within 30 days, not after quarter-end.
- Run a customer cohort analysis to identify churn risk among high-value accounts.

Data Sample (first 10 rows)

product_name	category	region	order_id	units	unit_price
Samsung TV	Electronics	Europe	1001	3	1299
